

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove set out on a cross country RV trip. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road expedition.

All through their journey, John reacquainted himself with previous business associates along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable marketplace for a product that could promptly and safely lift people in the air to accomplish maintenance and other construction functions.

After returning from their holiday, John set up a business with two of his friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design essentials of that original lift into current models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has extended itself into several global marketplaces and continues to cultivate innovative machines to ensure that consumers are able to become safer and more resourceful within their workplace.
